The Big Picture | The Great Awakening Report

but were quickly recognized as being highly relevant and possibly of key importance to the Great Awakening.

Whilst the transmissions themselves did not include accreditation, they bore the style of Q, and were thus interpreted as an appendix to the primary 8chan Qanon narrative.

The content of the Orit-B Codex correlates and expounds upon 'The Plan' that the chan-based Qanon project has outlined. It's focus is on merging the deep past of humanity with an optimal timeline into the future, beyond the fall of the Cabal.

The transmissions may be understood as a new chapter of the Q saga

GREAT SOLAR FLASH

ASCENSION INTO 5D EARTH

**INCOMING TRANSFORMATIVE
HIGHER VIBRATIONAL COSMIC ENERGY**

Every 25,000 years, our Solar System passes through higher energetic, geometric boundaries in our galaxy which cause widespread trans-dimensional upgrades of DNA in all life. Our consciousness began quickly ascending after crossing through the Galactic Equator in 2012.

As the Solar System passes into the Highly Energetic Cloud, all particles are increasing in vibration and crossing over into 5D reality. The cloud is heating energy into our Sun and charging it up to release a series of Great Solar Flashes building up to a large event.

Flashes cause a shift in consciousness as our DNA fully activates. Physical and spiritual transformation occurs. All lower vibrational cell codes continue existing in the new higher vibrational energies. Our civilization will witness Global ET Contact during this time. Free Energy will be released.
