

I see people newly interested in vaccine research .. Here is a list of credible information to help along the way .. feel free to post your own findings in comments to add to the list 📌

DATA COLLECTED BY CDC.. vaccinated vs NOT vaccinated.. these studies are hidden from the public & they said they don't do these studies as it's unethical not to vaccinate .. these studies can be obtained by ANYONE.. through the freedom of information act..

Elevated levels of measles antibodies in children with autism. - PubMed - NCBI

Pediatr Neurol. 2003 Apr;28(4):292-4. Research Support, Non-U.S. Gov't

[ncbi.nlm.nih.gov](http://www.ncbi.nlm.nih.gov)

A study published in the Journal of Biomedical Sciences determined that the autoimmunity to the central nervous system may play a causal role in autism. Researchers discovered that because many autistic children harbour elevated levels of measles antibodies, they should conduct a serological study of measles-mumps-rubella (MMR) and myelin basic protein (MBP) autoantibodies. They used serum samples of 125 autistic children and 92 controlled children. Their analysis showed a significant increase in the level of MMR antibodies in autistic children. The study concludes that the autistic children had an inappropriate or abnormal antibody response to MMR. The study determined that autism could be a result from an atypical measles infection that produces neurological symptoms in some children. The source of this virus could be a variant of MV, or it could be the MMR vaccine.
